REDD+ E-ACADEMY

NAME: Saad Ahmed Jamal

DATE OF ISSUANCE: July 13, 2019

LEARNING OBJECTIVES:

- Describe the process and objectives of developing a National Forest Monitoring System.
- Explain the importance of developing Forest Reference [Emission] Levels (FRELs/FRLs).
- Explain the need for Safeguard Information Systems in REDD+ implementation.
- Describe the characteristics of an Incentive Allocation System.
- Describe the importance of stakeholder engagement for successful REDD+ implementation.
- Describe the underlying governance factors that can affect REDD+ implementation.

MODULES:

1. National Forest Monitoring Systems for REDD+
2. Forest Reference Emission Levels (FRELs)
3. REDD+ Safeguards under the UNFCCC
4. Approaches for the Allocation of Incentives
5. Stakeholder Engagement in REDD+
6. Good Governance

DURATION: 12 estimated hours for completion.

This course has been developed by the United Nations Collaborative Programme on Reducing Emissions from Deforestation and Forest Degradation (UN-REDD). UN-REDD supports nationally led REDD+ processes and promotes the informed and meaningful involvement of all stakeholders, including indigenous peoples and other forest-dependent communities.
